Description:
The Wheelchair Foundation was established in June 2000 by philanthropist Ken Behring in California and was launched at the RI Convention in San Antonio. It had by chance come to Ken's notice some 100 million throughout the world were without the basic mobility of a wheelchair. He found that by using his business skills he could supply a new all terrain wheelchair at a cost far below the normal price. He then set a goal to supply at least 1 million wheelchairs in 5 years.

An association was formed with Rotary that the Wheelchair Foundation would match penny for penny any monies donated by Rotarians thus making it possible to fund delivery of a new wheelchair at 50% of cost.

The Wheelchair Foundation sends the chairs in containers of 280 wheelchairs to an area where Rotarians or recognised NGO's are available to ensure that the distribution is to those only in need and without payment. If a club or district is able to fund the whole container then they can specify the country and area to receive the benefit if the logistics are possible.

In 2004, following a successful launch of the programme in D1040 the Trustees decided to form a UK based Wheelchair Foundation and Trustees appointed.

The cost of a wheelchair and all other costs is approximately US \$150 but for RIBI purposes we will use the criteria of £100. Therefore, with the 50% matching funds available for the
